ART FOR ARCHITECTURAL DETAILS

OUR PHILOSOPHY

Lift Design approaches Art, Craft, Architecture and our Clients with the respect and sensitivity for today's demands; and a vision for tomorrow's concerns. We believe that collaboration and open communication is a prerequisite for infusing a personalized signature into each endeavor.

Our objective is to create unique and timeless surfaces that become an integral part of your project. Whether you use our creativity and skill for artful surfaces or for three-dimensional artwork, our goal is to transform expressive designs into a jewel-like environment that captivates your audience.

Art accents
and punctuates
the architectural phrase

while celebrating the gift
of hospitality.

Christian Heckscher

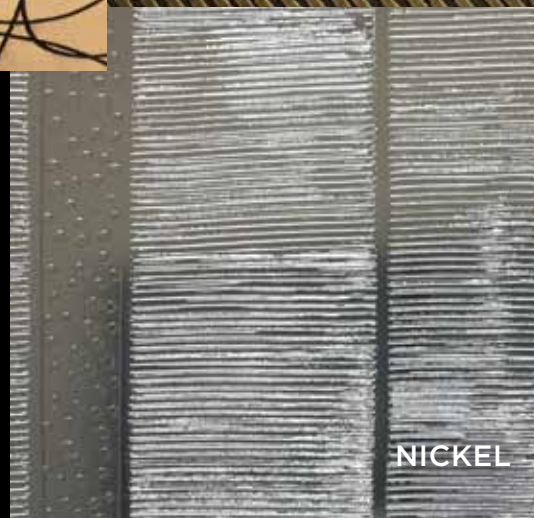

STANDARD CREATIONS

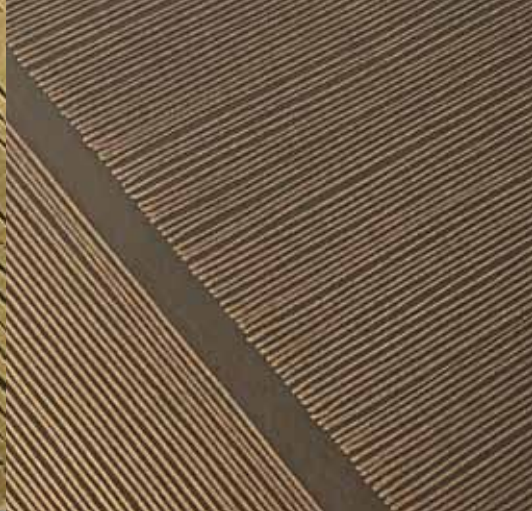

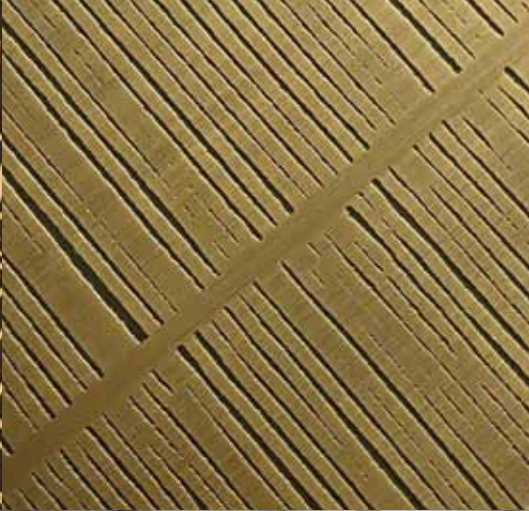

Lift Design also offers a choice of several patterns and finishes that - while standard in form are true standouts in appeal - making them suitable for a range of hospitality, commercial, or residential projects from high-end to those more modest.

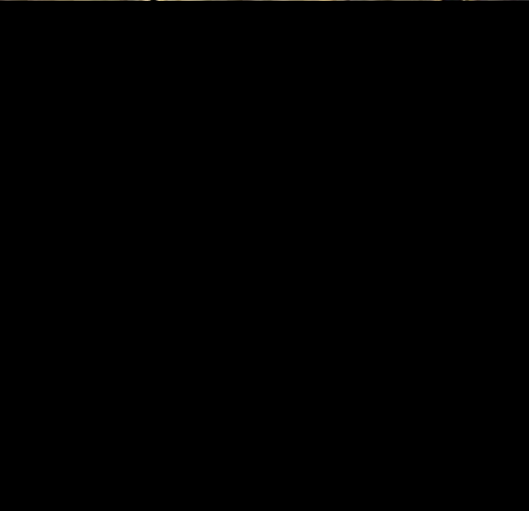

Standard patterns: Altar, Sand and Lace.

Finishes: Bronze, Antique Bronze and Nickel.

Artistic functional forms grace the luxurious interiors of major hotels, restaurants, casinos, office buildings, and high-end private residences.

CUSTOM CREATIONS

Technology is important, but craftsmanship remains an art form that is here to stay. The Lift Design team takes pride in producing hand-made custom-work that is informed by research and infused with creativity.

This collaborative process provides sophisticated clients who prioritize and appreciate the natural touch and sensuality found in the artistic rendering of an idea with unique artwork and exclusive finishes that are tailor-made to fit distinctive projects.

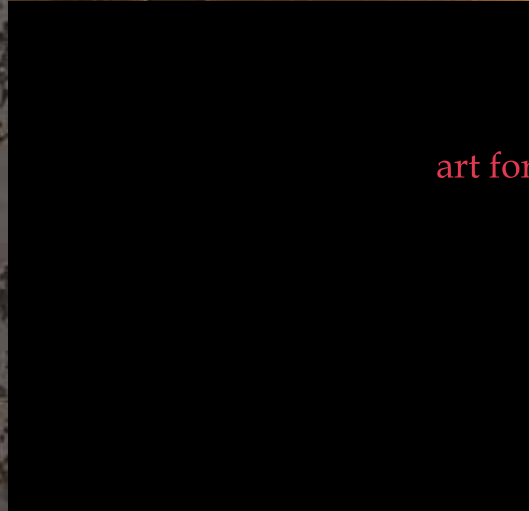

Since 1971, our creations and realizations have been delivered worldwide.

**YOUR CREATION. OUR
FINISHES AND PRODUCTION**

In addition to custom and production work, Lift Design can produce elevator door skins and interior elevator cab decorative panels with the client's proposed artwork or pattern.

We will manufacture the panels and provide with the desired standard or custom-made finish on the product.
